

Preparation Instructions for Cockroach Treatment

Your service is scheduled on: _____ between _____ and _____

In order to do the best possible job for you we will need your help and assistance. Please do the following preparation prior to our service. Failure to do so may incur a fee assessed by your management.

1. **Kitchen:** Remove **EVERYTHING** from under the kitchen sink. Also clear the top of the refrigerator and microwave. If cabinets and drawers need to be washed, please do this **BEFORE** treatment. Reduce clutter and items on kitchen counters.
2. **Bathroom:** Remove **EVERYTHING** from under sink.
3. **Bedrooms:** Remove **EVERYTHING** from the closet containing the water heater.

Preparation of your residence must be complete before our arrival in order for treatment to be done. NO EXCEPTIONS.

The cockroach has different stages in its life cycle and no single insecticide treatment can eliminate all the stages at one time. If you are having activity after 2-weeks from our treatment, notify your complex manager. No re-treatments will be performed before a 2-week waiting period has passed.

We apologize for any inconvenience to you, however to fully treat your residence these items need to be done. If you have any questions regarding preparation, contact our office for more information. Please identify yourself and which complex you live at when you call. This will help us provide the information you request promptly.

You do not need to leave your residence for this service!!
